Dear Hiring Team at Konrad,

I am writing to express my interest in the entry-level Software Developer position at Konrad, as advertised. With a Bachelor of Science in Computer Science from Simon Fraser University and hands-on experience in software development, I am eager to contribute to your innovative team.

During my 8-month internship at Redmane Technology, I honed my skills in full-stack development, collaborating closely with a dynamic team to create cutting-edge applications. This experience instilled in me the value of teamwork, accelerated my project delivery, and strengthened my ability to engage with clients effectively.

My project portfolio includes a 2D arcade game in Java, a music player application for iOS using SwiftUI and MusicKit API, and a Rubik's Cube solver in Python3 using artificial intelligence. These projects have not only showcased my technical proficiency but also my ability to work in diverse teams and deliver high-quality solutions.

I am particularly excited about the opportunity at Konrad because of your commitment to creating best-in-class digital products and your culture of learning and development. I am confident that my technical skills in Python, ReactJS, TypeScript, C++, SQL, NodeJS, CSS, HTML, and SwiftUI, combined with my proactive and collaborative approach, make me a strong fit for this role.

Thank you for considering my application. I am looking forward to the possibility of contributing to your team and am available at your earliest convenience for an interview.

Warm regards,

Harmeet Rai
